

INDOOR UNITS ALLOW YOU TO CREATE INDIVIDUAL COMFORT ZONES

Control the temperature within any space using a wall-, ceiling- or floor-mounted indoor unit—whichever works best for the specific room or area. You can fine-tune your comfort while you save money by cooling or heating only the spaces you use.

Multi-position Ducted

The perfect solution for larger zones or the entire floor (Multi-zone applications only).

Wall-mounted

Slim, wall-mounted units provide individual room comfort control.

Ceiling-recessed

Wider airflow pattern for better air distribution in a less obtrusive style.

Horizontal-ducted

Provides comfort and efficiency while staying hidden in ceiling or floor.

Floor-mounted

Ideal for areas that are smaller or don't have as much wall space (Multi-zone applications only).

MAKE COMFORT PERSONAL
Now you have a choice: Cool and Heat your entire home or just one room at a time. See *inside*.

THE PERFECT SOLUTION FOR COOLING AND HEATING YOUR HOME

MITSUBISHICOMFORT.COM

EFFICIENT INDIVIDUAL ROOM CONTROL

Mitsubishi Electric Cooling & Heating systems offer you the most advanced technology that allows you to enjoy more precise comfort in one or multiple rooms – while saving on energy bills and contributing to a greener planet.

“ We saved
\$650
on energy costs...
and we have a
GREATER
comfort zone.”

EVELYN KENNEDY
Gales Ferry, Connecticut

SAVE MONEY LIVE BETTER

Mitsubishi Electric Cooling & Heating systems are dramatically more efficient than traditional systems. Mitsubishi Electric INVERTER-driven compressor technology ensures that the unit uses only the exact amount of energy needed to cool or heat an area by automatically sensing and responding to changes in the area without the unit turning on and off. As a result, the cooling unit can be up to 40 percent more efficient than standard window units (our units rank among the highest on the market in energy saving systems, up to 33.1 SEER). This means that you reduce your energy consumption and save money on your energy bill. Options include many ENERGY STAR® qualified models.

DON'T DELAY YOUR COMFORT

An investment in a Mitsubishi Electric Cooling & Heating system pays for itself in energy savings – and you have plenty of options to enjoy ultimate comfort in any room. With wall-mounted, floor-mounted and even ducted units that disappear into your ceiling – you can choose whatever works best for your space.

Select your unit today at mitsubishicomfort.com.

“ I could control
the rooms
I use the most.
My bills were
as low as \$75
...before it was
typically \$300.”

RICHARD LOSTRILITO
Rockville, Maryland

Results of actual energy savings may vary depending on conditions of usage, electrical supply service and local weather conditions.

EASE OF INSTALLATION WITH NO MESS OR DISRUPTION TO YOUR LIFE

One of the great benefits of the Mitsubishi Electric Cooling & Heating system is its ease of installation. A qualified contractor can usually install it in about a day. There is no ductwork required, so you don't have to worry about creating a big mess, interrupting your life or costly remodeling expenses – maintaining the architectural integrity of your home.

INVERTER
For more efficient
energy use

i-see Sensor
For active
room temperature
measurement

H2i
For superior
heating

The sleek indoor unit mounts discreetly in the space and refrigerant lines connect it to the outdoor unit through a small 3" inch opening. Some of the outdoor units can handle up to eight indoor units, so you can enjoy ultimate comfort and independent comfort control in multiple rooms.

HOW IT WORKS

Like a car's cruise control, our advanced INVERTER-driven compressor technology varies the compressor speed based on cooling and heating needs in your space. So you get consistent temperatures – while saving energy year-round. And that's just the start of the technology advances that make Mitsubishi Electric systems superior to other options.

Another such example is our i-see™ Sensor which automatically detects troublesome regions of temperature closer to the ceiling and floor and then makes adjustments to fix them. Our H2i® technology can heat your space effectively even when temperatures outside are down to -13° F. And our Hot Start technology provides hot air from the start with no drafts.

- ▶ **#1 SELLING DUCTLESS BRAND** in America.
- ▶ **ENERGY EFFICIENCY** starts saving you money right away.
